To foster a community that acknowledges its heritage, values and lifestyles whilst encouraging sustainable development

Principal place of business: 15 Adam Street Nannup WA 6275

SHIRE OF NANNUP FINANCIAL REPORT FOR THE YEAR ENDED 30 JUNE 2024

Local Government Act 1995 Local Government (Financial Management) Regulations 1996

STATEMENT BY CEO

The accompanying financial report of the Shire of Nannup has been prepared in compliance with the provisions of the *Local Government Act 1995* from proper accounts and records to present fairly the financial transactions for the reporting period ended 30 June 2024 and the financial position as at 30 June 2024.

At the date of signing this statement the particulars included in the financial report are not misleading or inaccurate.

Signed on the

31st day of

January 2025

Chief Executive Officer David Taylor

CEO

| | | |

1. BASIS OF PREPARATION

The financial report of the Shire of Nannup which is a Class 4 local government comprises general purpose financial statements which have been prepared in accordance with the *Local Government Act 1995* and accompanying regulations.

Local Government Act 1995 requirements

Section 6.4(2) of the Local Government Act 1995 read with the Local Government (Financial Management) Regulations 1996 prescribe that the financial report be prepared in accordance with the Local Government Act 1995 and, to the extent that they are not inconsistent with the Local Government Act 1995, the Australian Accounting Standards. The Australian Accounting Standards (as they apply to local governments and not-for-profit entities) and Interpretations of the Australian Accounting Standards Board except for disclosure requirements of: • AASB 7 Financial Instruments Disclosures

- AASB 7 Financial instruments bi AASB 16 Leases paragraph 58
- AASB 101 Presentation of Financial Statements paragraph 61
- AASB 107 Statement of Cash Flows paragraphs 43 and 45
- AASB 116 Property, Plant and Equipment paragraph 79
- AASB 137 Provisions, Contingent Liabilities and Contingent Assets paragraph 85
- AASB 140 Investment Property paragraph 75(f)
- AASB 1052 Disaggregated Disclosures paragraph 11
- AASB 1054 Australian Additional Disclosures paragraph 16

The Local Government (Financial Management) Regulations 1996 specify that vested land is a right-of-use asset to be measured at cost, and is considered a zero cost concessionary lease. All right-of-use assets under zero cost concessionary lease are measured at zero cost rather than at fair value, except for vested improvements on concessionary land leases such as roads, buildings or other infrastructure which continue to be reported at fair value, as opposed to the vested land which is measured at zero cost. The measurement of vested improvements at fair value is a departure from AASB 16 Leases which would have required the Shire to measure any vested improvements at zero cost.

The Local Government (Financial Management) Regulations 1996 provide that: - Land and buildings classified as property, plant and equipment; or

Infrastructure; or
 Vested improvements that the local government controls;

- Vested improvements that the local government controls, measured at reportable value, are only required to be revalued every five years. Revaluing these non-financial assets every five years is a departure from AASB 116: Property, Plant and Equipment, which would have required the Shire to assessed at each reporting date whether the carrying amount of the above mentioned non-financial assets materiality differs from their fair value and, if so, revalue the class of non-financial asset.

Accounting policies which have been adopted in the preparation of this financial report have been consistently applied unless stated otherwise. Except for cash flow and rate setting information, the financial report has been prepared on the accrual basis and is based on historical costs, modified, where applicable, by the measurement at fair value of selected non-current assets, financial assets and liabilities.

Critical accounting estimates and judgements

The preparation of a financial report in conformity with Australian Accounting Standards requires management to make judgements, estimates and assumptions that effect the application of policies and reported amounts of assets and liabilities, income and expenses.

The estimates and associated assumptions are based on historical experience and various other factors that are believed to be reasonable under the circumstances; the results of which form the basis of making the judgements about carrying amounts of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates.

As with all estimates, the use of different assumptions could lead to material changes in the amounts reported in the financial report.

The following are estimates and assumptions that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year and further information on their nature and impact can be found in the relevant note:

- · Fair value measurement of assets carried at reportable
- value including:
- Property, plant and equipment note 8
- Infrastructure note 9

Measurement of employee benefits - note 15

Fair value heirarchy information can be found in note 23

The local government reporting entity

All funds through which the Shire controls resources to carry on its functions have been included in the financial statements forming part of this financial report.

All monies held in the Trust Fund are excluded from the financial statements. A separate statement of those monies appears at Note 0 of the financial report.

Initial application of accounting standards

During the current year, the following new or revised Australian Accounting Standards and Interpretations were applied for the first time.

 AASB 2021-2 Amendments to Australian Accounting Standards
 Disclosure of Accounting Policies or Definition of Accounting Estimates

This standard resulted in terminology changes relating to material accounting policies (formerly referred to as significant accounting policies).

New accounting standards for application in future years The following new accounting standards will have application to local government in future years:

AASB 2014-10 Amendments to Australian Accounting Standards
 Sale or Contribution of Assets between an Investor and its
 Associate or Joint Venture

- AASB 2020-1 Amendments to Australian Accounting Standards
 Classification of Liabilities as Current or Non-Current
- AASB 2021-7c Amendments to Australian Accounting Standards
 Effective Date of Amendments to AASB 10 and AASB 128 and Editorial Corrections [deferred AASB 10 and AASB 128 amendments in AASB 2014-10 apply]
- AASB 2022-5 Amendments to Australian Accounting Standards
 Lease Liability in a Sale and Leaseback
- AASB 2022-6 Amendments to Australian Accounting Standards
 Non-current Liabilities with Covenants

These amendments are not expected to have any material impact on the financial report on initial application.

- AASB 2022-10 Amendments to Australian Accounting Standards
 Fair Value Measurement of Non-Financial Assets of Not-for-
- Profit Public Sector Entities

These amendment may result in changes to the fair value of non-financial assets. The impact is yet to be quantified.

AASB 2023-1 Amendments to Australian Accounting Standards
 Supplier Finance Arrangements

These amendments may result in additional disclosures in the case of applicable finance arrangements.

2. REVENUE AND EXPENSES

(a) Revenue

Contracts with customers

Recognition of revenue is dependant on the source of revenue and the associated terms and conditions associated with each source of revenue and recognised as follows:

| Revenue Category Grants, subsidies and contributions | Nature of goods and services Community events, minor facilities, | When obligations typically satisfied Over time | Payment terms Fixed terms transfer of funds based on agreed | Returns/Refunds/ Warranties Contract obligation if | Timing of revenue recognition Output method based on project milestones |
|---|---|--|---|--|--|
| | research, design, planning evaluation and services | | milestones and reporting | project net complete | and/or completion date matched to performance obligations |
| Capital Grants, subsidies and contributions | Construction or acquisition of recognisable non- financial assets to be controlled by the local government | Over time | Fixed terms transfer of funds base don agreed milestones and reporting | 0 | Output method based on project milestones and/or completion date matched to performance obligations |
| Fees and charges - licenses, registrations, approvals | Building, planning, development and animal management. | Single point in time | Full payment prior to issue | None | On payment of the license, registration or approval |
| Fees and charges - waste management collections | Kerbside collection service | over time | Payment on an annual basis in advance | None | Output method based on regular weekly and fortnightly period as proportionate to collection service |
| Fees and charges - waste management entry fees | Waste treatment, recycling and disposal service at disposal sites | Single point in time | Payment in advance at gate or on normal trading terms if credit provided | None | On entry to facility |
| Fees and charges - Facility Hire and Entry | Use of halls an facilities | Single point in time | Full payment in advance | Refund if event cancelled within 7 days | On entry or at conclusion of hire |
| Fees and charges - Other Goods and services | Cemetery services, library fees, reinstatements and private works | Single point in time | Full payment in advance | None | Output method based on provision of service or competition of works |
| Other revenue - Reimbursements | Insurance claims | Single point in time | Payment in arrears for claimable event | None | When claim is agreed |

Consideration from contracts with customers is included in the transaction price.

2. REVENUE AND EXPENSES (Continued)

Revenue Recognition

Revenue recognised during the year under each basis of recognition by nature of goods or services is provided in the table below:

For the year ended 30 June 2024

Restricted financial assets

Restricted financial asset balances are not available for general use

contributions and unspent loans that have not been fully expended in the manner specified by the contributor, legislation or loan agreement

by the local government due to externally imposed restrictions.

Restrictions are specified in an agreement, contract or legislation.

This applies to reserve accounts, unspent grants, subsidies and

and for which no liability has been recognised.

MATERIAL ACCOUNTING POLICIES

Cash and cash equivalents

Cash and cash equivalents include cash on hand, cash at bank, deposits available on demand with banks and other short term highly liquid investments with original maturities of three months or less that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value.

Bank overdrafts are reported as short term borrowings in current liabilities in the statement of financial position.

MATERIAL ACCOUNTING POLICIES

Other financial assets at amortised cost The Shire classifies financial assets at amortised cost if both of the following criteria are met:

- the asset is held within a business model whose objective is to collect the contractual cashflows, and
- the contractual terms give rise to cash flows that are solely payments of principal and interest.

Fair values of financial assets at amortised cost are not materially different to their carrying amounts, since the interest receivable on those assets is either close to current market rates or the assets are of a short term nature. Non-current financial assets at amortised cost fair values are based on discounted cash flows using a current market rates. They are classified as level 2 fair values in the fair value hierachy (see Note 23 (i)) due to the observable market rates).

Interest received is presented under cashflows from operating activities in the Statement of Cash Flows where it is earned from financial assets that are held for cash management purposes.

Financial assets at fair value through profit or loss

The Shire has elected to classify the following financial assets at fair value through profit or loss:

- debt investments which do not qualify for measurement at either amortised cost or fair value through other comprehensive income.

- equity investments which the Shire has elected to recognise as fair value gains and losses through profit or loss.

5. TRADE AND OTHER RECEIVABLES

| Current |
|---------|
| Current |

Rates and statutory receivables Trade receivables Other receivables GST receivable

Non-current

Rates and statutory receivables

MATERIAL ACCOUNTING POLICIES Rates and statutory receivables

Rates and statutory receivables are non-contractual receivables arising from statutory requirements and include amounts due from ratepayers for unpaid rates and service charges and other statutory charges or fines.

Rates and statutory receivables are recognised when the taxable event has occurred and can be measured reliably.

Trade receivables

Trade receivables are amounts receivable from contractual arrangements with customers for goods sold, services performed or grants or contributions with sufficiently specific performance obligations or for the construction of recognisable non financial assets as part of the ordinary course of business.

Other receivables

Other receivables are amounts receivable from contractual arrangements with third parties other than contracts with customers and amounts received as grants for the construction of recognisable non financial assets.

Measurement

Trade and other receivables are recognised initially at the amount of the transaction price, unless they contain a significant financing component, and are to be recognised at fair value.

6. INVENTORIES

| | 7,654 | 4,164 |
| | Note | \$ 7,654 7,654 ; ; ; ; ; ; ; ; ; ; ; ; ; ; ; ; ; ; ; |

MATERIAL ACCOUNTING POLICIES

General Inventories are measured at the lower of cost and net realisable value.

Net realisable value is the estimated selling price in the ordinary course of business less the estimated costs of completion and the estimated costs necessary to make the sale.

Classification and subsequent measurement

Note

Receivables which are generally due for settlement within 30 days except rates receivables which are expected to be collected within 12 months are classified as current assets. All other receivables such as, deferred pensioner rates receivable after the end of the reporting period are classified as non-current assets.

Trade and other receivables are held with the objective to collect the contractual cashflows and therefore the Shire measures them subsequently at amortised cost using the effective interest rate method.

Due to the short term nature of current receivables, their carrying amount is considered to be the same as their fair value. Non-current receivables are indexed to inflation, any difference between the face value and fair value is considered immaterial.

7. OTHER ASSETS

| | 2024 | 2023 |
|------------------------|--------|---------|
| | \$ | \$ |
| Other assets - current | | |
| Accrued income | 72,095 | 285,558 |
| | 72,095 | 285,558 |

MATERIAL ACCOUNTING POLICIES

Other current assets

Other non-financial assets include prepayments which represent payments in advance of receipt of goods or services or that part of expenditure made in one accounting period covering a term extending beyond that period.

8. PROPERTY, PLANT AND EQUIPMENT

(a) Movements in Balances

Movement in the balances of each class of property, plant and equipment between the beginning and the end of the current financial year.

8. PROPERTY, PLANT AND EQUIPMENT (Continued)

(b) Carrying Amount Measurements

| Asset Class | Fair Value Hierarchy | Valuation Technique | Basis of Valuation | Date of Last Valuation | Inputs Used |
|-------------------------------------|-------------------------|--|-------------------------------------|---------------------------|--|
| (i) Fair Value - as determined at t | he last valuation | date | | | |
| Land and buildings | | | | | |
| Land | 2 | Market approach using recent observable market data for similar properties | Independent registered valuer | June 2024 | Price per square meter |
| Buildings - non-specialised | 3 | Cost approach using current replacement cost | Independent registered valuer | June 2024 | Construction costs and current condition, residual values and remaining useful life assessments inputs |
| Buildings - specialised | 3 | Cost approach using current replacement cost | Independent registered valuer | June 2024 | Construction costs and current condition, residual values and remaining useful life assessments inputs |

Level 3 inputs are based on assumptions with regards to future values and patterns of consumption utilising current information. If the basis of these assumptions were varied, they have the potential to result in a significantly higher or lower fair value measurement.

During the period there were no changes in the valuation techniques used by the local government to determine the fair value of property, plant and equipment using either level 2 or level 3 inputs. The valuation techniques applied to property subject to lease was the same as that applied to property not subject to lease.

| Infrastructure - bridges | 3 | Cost approach using current replacement cost | Independent registered valuer | June 2024 | Construction costs and current condition, residual values and remaining useful life assessments inputs |
| Infrastructure - parks and ovals | 3 | Cost approach using current replacement cost | Independent registered valuer | June 2024 | Construction costs and current condition, residual values and remaining useful life assessments inputs |
| Infrastructure - other | 3 | Cost approach using current replacement cost | Independent registered valuer | June 2024 | Construction costs and current condition, residual values and remaining useful life assessments inputs |

Level 3 inputs are based on assumptions with regards to future values and patterns of consumption utilising current information. If the basis of these assumptions were varied, they have the potential to result in a significantly higher or lower fair value measurement.

During the period there were no changes in the valuation techniques used to determine the fair value of infrastructure using level 3 inputs.

10. FIXED ASSETS

(a) Depreciation

Depreciation rates

Typical estimated useful lives for the different asset classes for the current and prior years are included in the table below:

Asset Class

Buildings - non-specialised Buildings - specialised Furniture and equipment Plant and equipment Infrastructure - roads Infrastructure - footpaths & cycleways Infrastructure - drainage Infrastructure - bridges Infrastructure - parks and ovals Right-of-use plant and equipment

Useful life

20 to 100 years 20 to 100 years 4 to 10 years 4 to 20 years 10 to 80 years 35 to 60 years 60 to 80 years 90 to 125 years 50 to 75 years Based on the remaining lease term

10. FIXED ASSETS (Continued)

Initial recognition

MATERIAL ACCOUNTING POLICIES

An item of property, plant and equipment or infrastructure that qualifies for recognition as an asset is measured at its cost.

Upon initial recognition, cost is determined as the amount paid (or other consideration given) to acquire the assets, plus costs incidental to the acquisition. The cost of non-current assets constructed by the Shire includes the cost of all materials used in construction, direct labour on the project and an appropriate proportion of variable and fixed overheads. For assets acquired at zero cost or otherwise significantly less than fair value, cost is determined as fair value at the date of acquisition.

Assets for which the fair value as at the date of acquisition is under \$5,000 are not recognised as an asset in accordance with *Local Government (Financial Management) Regulation 17A(5).* These assets are expensed immediately.

Where multiple individual low value assets are purchased together as part of a larger asset or collectively forming a larger asset exceeding the threshold, the individual assets are recognised as one asset and capitalised.

Individual assets that are land, buildings and infrastructure acquired between scheduled revaluation dates of the asset class in accordance with the Shire's revaluation policy, are recognised at cost and disclosed as being at reportable value.

Measurement after recognition

Plant and equipment including furniture and equipment and right-of-use assets (other than vested improvements) are measured using the cost model as required under *Local Government (Financial Management) Regulation 17A(2).* Assets held under the cost model are carried at cost less accumulated depreciation and any impairment losses being their reportable value.

Reportable Value

In accordance with Local Government (Financial Management) Regulation 17A(2), the carrying amount of non-financial assets that are land and buildings classified as property, plant and equipment, investment properties, infrastructure or vested improvements that the local government controls.

Reportable value is for the purpose of *Local Government (Financial Management) Regulation 17A(4)* is the fair value of the asset at its last valuation date minus (to the extent applicable) the accumulated depreciation and any accumulated impairment losses in respect of the non-financial asset subsequent to its last valuation date.

Revaluation

Land and buildings classified as property, plant and equipment, infrastructure or vested improvements that the local government controls and measured at reportable value, are only required to be revalued every five years in accordance with the regulatory framework. This includes buildings and infrastructure items which were pre-existing improvements (i.e. vested improvements) on land vested in the Shire.

Whilst the regulatory framework only requires a revaluation to occur every five years, it also provides for the Shire to revalue earlier if it chooses to do so.

For land, buildings and infrastructure, increases in the carrying amount arising on revaluation of asset classes are credited to a revaluation surplus in equity.

Decreases that offset previous increases of the same class of asset are recognised against revaluation surplus directly in equity. All other decreases are recognised in profit or loss.

Subsequent increases are then recognised in profit or loss to the extent they reverse a net revaluation decrease previously recognised in profit or loss for the same class of asset.

Depreciation

The depreciable amount of all property, plant and equipment and infrastructure, are depreciated on a straight-line basis over the individual asset's useful life from the time the asset is held ready for use. Leasehold improvements are depreciated over the shorter of either the unexpired period of the lease or the estimated useful life of the improvements.

The assets residual values and useful lives are reviewed, and adjusted if appropriate, at the end of each reporting period.

Depreciation on revaluation

When an item of property, plant and equipment and infrastructure is revalued, any accumulated depreciation at the date of the revaluation is treated in one of the following ways:

(i) The gross carrying amount is adjusted in a manner that is consistent with the revaluation of the carrying amount of the asset.(ii) Eliminated against the gross carrying amount of the asset and the net amount restated to the revalued amount of the asset.

Impairment

In accordance with Local Government (Financial Management) Regulations 17A(4C), the Shire is not required to comply with AASB 136 Impairment of Assets to determine the recoverable amount of its non-financial assets that are land or buildings classified as property, plant and equipment, infrastructure or vested improvements that the local government controls in circumstances where there has been an impairment indication of a general decrease in asset values.

In other circumstances where it has been assessed that one or more of these non-financial assets are impaired, the asset's carrying amount is written down immediately to its recoverable amount if the asset's carrying amount is greater than its estimated recoverable amount.

Gains or losses on disposal

Gains and losses on disposals are determined by comparing proceeds with the carrying amount. These gains and losses are included in the statement of comprehensive income in the period in which they arise.

11. LEASES

(a) Right-of-Use Assets

| | | Right-of-use assets · | |
|--|------|-----------------------|---------------------|
| Movement in the balance of each class of right-of-use asset | | plant and | Right-of-use assets |
| between the beginning and the end of the current financial year. | Note | equipment | Total |

|) Lease Liabilities | | |
| Current | 7,921 | 12,753 |
| 26(c) | 7,921 | 12,753 |

Secured liabilities and assets pledged as security

Lease liabilities are effectively secured, as the rights to the leased assets recognised in the financial statements revert to the lessor in the event of a default.

MATERIAL ACCOUNTING POLICIES

Leases

(b)

At inception of a contract, the Shire assesses if the contract contains or is a lease. A contract is, or contains, a lease if the contract conveys the right to control the use of an identified for a period of time in exchange for consideration.

At the commencement date, a right-of-use asset is recognised at cost and lease liability at the present value of the lease payments that are not paid at that date. The lease payments are discounted using the interest rate implicit in the lease, if that rate can be readily determined. If that rate cannot be readily determined, the Shire uses its incremental borrowing rate.

All contracts that are classified as short-term leases (i.e. a lease with a term of 12 months or less) and leases of low value assets are recognised as an operating expense on a straight-line basis over the term of the lease.

Details of individual lease liabilities required by regulations are provided at Note 26(c).

Right-of-use assets - measurement

Right-of-use assets are measured at cost. All right-of-u (other than vested improvements) under zero cost conc leases are measured at zero cost (i.e. not recognised ir Statement of Financial Position). The exception is veste improvements on concessionary land leases such as ro buildings or other infrastructure which are reported at fa

Refer to Note 10 under revaluation for details on the ma accounting policies applying to vested improvements.

Right-of-use assets - depreciation

Right-of-use assets are depreciated over the lease tern useful life of the underlying asset, whichever is the sho Where a lease transfers ownership of the underlying as or the cost of the right-of-use asset reflects that the Shire anticipates to exercise a purchase option, the specific asset is depreciated over the useful life of the underlying asset.

12. TRADE AND OTHER PAYABLES

| | \$ | \$ |
|-----------------------------|---------|---------|
| Current | | |
| Sundry creditors | 135,394 | 242,070 |
| Prepaid rates | 32,684 | 37,852 |
| Accrued payroll liabilities | 51,245 | 40,260 |
| ATO liabilities | 109,137 | 47,751 |
| Bonds and deposits held | 100,888 | 91,186 |
| Accrued Expenses | 0 | 35,019 |
| | 429,348 | 494,138 |

MATERIAL ACCOUNTING POLICIES Financial liabilities

Financial liabilities are initially recognised at fair value when the Shire becomes a party to the contractual provisions of the instrument.

Non-derivative financial liabilities (excluding financial guarantees) are subsequently measured at amortised cost.

Financial liabilities are derecognised where the related obligations are discharged, cancelled or expired. The difference between the carrying amount of the financial liability extinguished or transferred to another party and any consideration paid, including the transfer of non-cash assets or liabilities assumed, is recognised in profit or loss.

Trade and other payables

2024

Trade and other payables represent liabilities for goods and services provided to the Shire prior to the end of the financial year that are unpaid and arise when the Shire becomes obliged to make future payments in respect of the purchase of these goods and services. The amounts are unsecured, are recognised as a current liability and are usually paid within 30 days of recognition. The carrying amounts of trade and other payables are considered to be the same as their fair values, due to their short-term nature.

2023

Prepaid rates

Prepaid rates are, until the taxable event has occurred (start of the next financial year), refundable at the request of the ratepayer. Rates received in advance are initially recognised as a financial liability. When the taxable event occurs, the financial liability is extinguished and the Shire recognises income for the prepaid rates that have not been refunded.

| 13. OTHER LIABILITIES | 2024 | 2023 |
|---|-----------|-----------|
| | \$ | \$ |
| Current | | |
| Capital grant/contributions liabilities | 1,780,206 | 452,864 |
| | 1,780,206 | 452,864 |
| Opening balance | 452,864 | 549,645 |
| Additions | 1,780,206 | 51,904 |
| Revenue from capital grant/contributions held as a liability at | | |
| the start of the period | (452,864) | (148,685) |
| | 1,780,206 | 452,864 |

Performance obligations in relation to capital grant/contribution liabilities are satisfied as project milestones are met or completion of construction or acquisition of the asset.

MATERIAL ACCOUNTING POLICIES

Capital grant/contribution liabilities

Capital grant/contribution liabilities represent the Shire's obligations to construct recognisable non-financial assets to identified specifications to be controlled by the Shire which are yet to be satisfied. Capital grant/contribution liabilities are recognised as income when the obligations in the contract are satisfied.

Fair values for non-current capital grant/contribution liabilities, not expected to be extinguished within 12 months, are based on discounted cash flows of expected cashflows to satisfy the obligations using a current borrowing rate. They are classified as level 3 fair values in the fair value hierarchy (see Note 23(i)) due to the unobservable inputs, including own credit risk.

14. BORROWINGS

| | | | 2024 | | | 2023 | | |
|--------------------------|-------|---------------------|---------|---------|--------|-------------|---------|--|
| | Note | Current Non-current | | Total | Curren | Non-current | Total | |

| Total secured borrowings | 26(a) | 95,588 | 569,209 | 664,797 | 93,027 | 664,796 | 757,823 | |

Secured liabilities and assets pledged as security

MATERIAL ACCOUNTING POLICIES

Borrowing costs

The Shire has elected to recognise borrowing costs as an expense when incurred regardless of how the borrowings are applied.

Fair values of borrowings are not materially different to their carrying amounts, since the interest payable on those borrowings is either close to current market rates or the borrowings are of a short term nature. Borrowings fair values are based on discounted cash flows using a current borrowing rate. They are classified as level 3 fair values in the fair value hierachy (see Note 23(i)) due to the unobservable inputs, including own credit risk.

Risk

Details of individual borrowings required by regulations are provided at Note 26(a).

15. EMPLOYEE RELATED PROVISIONS

Employee Related Provisions

| | 2024 | 2023 |
|---|---------|---------|
| Current provisions | \$ | \$ |
| Employee benefit provisions | | |
| Annual leave | 197,822 | 222,723 |
| Long service leave | 149,904 | 184,315 |
| | 347,726 | 407,038 |
| | | |
| Total current employee related provisions | 347,726 | 407,038 |
| | | |
| Non-current provisions | | |
| Employee benefit provisions | | |
| Long service leave | 42,372 | 37,662 |
| | 42,372 | 37,662 |
| | | |
| Total non-current employee related provisions | 42,372 | 37,662 |
| | | |
| Total employee related provisions | 390,098 | 444,700 |

Provision is made for benefits accruing to employees in respect of wages and salaries, annual leave and long service leave and associated on costs for services rendered up to the reporting date and recorded as an expense during the period the services are delivered.

Annual leave liabilities are classified as current, as there is no unconditional right to defer settlement for at least 12 months after the end of the reporting period.

MATERIAL ACCOUNTING POLICIES

Employee benefits

The Shire's obligations for employees' annual leave, long service leave and other employee leave entitlements are recognised as employee related provisions in the Statement of Financial Position.

Short-term employee benefits

Provision is made for the Shire's obligations for short-term employee benefits. Short-term employee benefits are benefits (other than termination benefits) that are expected to be settled wholly before 12 months after the end of the annual reporting period in which the employees render the related service, including wages, salaries and sick leave. Short-term employee benefits are measured at the (undiscounted) amounts expected to be paid when the obligation is settled.

The Shire's obligations for short-term employee benefits such as wages, salaries and sick leave are recognised as a part of current trade and other payables in the statement of financial position.

Other long-term employee benefits

Long-term employee benefits provisions are measured at the present value of the expected future payments to be made to employees. Expected future payments incorporate anticipated future wage and salary levels, durations of service and employee departures and are discounted at rates determined by reference to market yields at the end of the reporting period on government bonds that have maturity dates that approximate the terms of the obligations. Any remeasurements for changes in assumptions of obligations for other long-term employee benefits are recognised in profit or loss in the periods in which the changes occur.

The Shire's obligations for long-term employee benefits are presented as non-current provisions in its statement of financial position, except where the Shire does not have an unconditional right to defer settlement for at least 12 months after the end of the reporting period, in which case the obligations are presented as current provisions.

16. REVALUATION SURPLUS

19. CONTINGENT LIABILITIES

The Shire has a refuse site located at Reserve Number: 38737 - Lot 13219 on deposited plan 214941 - Beggars Road, Nannup. This site has been classified by the Department of Water and Environmental Regulation (DEWR) as 'possibly contaminated - investigation required.'

Until the Shire conducts an investigation to determine the presence and scope of contamination, assess the risk and agree with the DWER on the need and criteria for remediation on a risk based approach, the Shire is unable to estimate the potential costs associated with remediation of this site. This approach is consistent with the DWER Guidelines

These amounts include all salary and fringe benefits awarded to KMP except for details in

respect to fees and benefits paid to council members which may be separately found in the table above.

Post-employment benefits

These amounts are the current-year's cost of the Shire's superannuation contributions made during the year.

Other long-term benefits

These amounts represent annual leave and long service leave entitlements accruing during the year.

Council member costs

21. RELATED PARTY TRANSACTIONS (Continued)

Transactions with related parties

Transactions between related parties and the Shire are on normal commercial terms and conditions, no more favourable than those available to other parties, unless otherwise stated.

No outstanding balances or provisions for doubtful debts or guarantees exist in relation to related parties at year end.

| In addition to KMP compensation above the following transactions occurred with related parties: | 2024 <u>Actual</u> \$ | 2023 Actual \$ |
|---|-----------------------------|----------------------|
| Purchase of goods and services | 3,420 | 1,800 |

Related Parties

The Shire's main related parties are as follows:

i. Key management personnel

Any person(s) having authority and responsibility for planning, directing and controlling the activities of the Shire, directly or indirectly, including any council member, are considered key management personnel and are detailed in Notes 21(a) and 21(b).

ii. Other Related Parties

Short-term employee benefits related to an associate person of the CEO who was employed by the Shire under normal employment terms and conditions.

Outside of normal citizen type transactions with the Shire, there were no other related party transactions involving key management personnel and/or their close family members and/or their controlled (or jointly controlled) entities.

iii. Entities subject to significant influence by the Shire

There were no such entities requiring disclosure during the current or previous year.

22. EVENTS OCCURRING AFTER THE END OF THE REPORTING PERIOD

There were no events occurring after the end of the reporting period.

23. OTHER MATERIAL ACCOUNTING POLICIES

a) Goods and services tax (GST)

Revenues, expenses and assets are recognised net of the amount of GST, except where the amount of GST incurred is not recoverable from the Australian Taxation Office (ATO).

Receivables and payables are stated inclusive of GST receivable or payable. The net amount of GST recoverable from, or payable to, the ATO is included with receivables or payables in the statement of financial position.

Cash flows are presented on a gross basis. The GST components of cash flows arising from investing or financing activities which are recoverable from, or payable to, the ATO are presented as operating cash flows.

b) Current and non-current classification

The asset or liability is classified as current if it is expected to be settled within the next 12 months, being the Shire's operational cycle. In the case of liabilities where the Shire does not have the unconditional right to defer settlement beyond 12 months, such as vested long service leave, the liability is classified as current even if not expected to be settled within the next 12 months. Inventories held for trading are classified as current or non-current based on the Shire's intentions to release for sale.

c) Rounding off figures

All figures shown in this annual financial report, other than a rate in the dollar, are rounded to the nearest dollar. Amounts are presented in Australian Dollars.

d) Comparative figures

Where required, comparative figures have been adjusted to conform with changes in presentation for the current financial year.

When the Shire applies an accounting policy retrospectively, makes a retrospective restatement or reclassifies items in its financial statements that has a material effect on the statement of financial position, an additional (third) Statement of Financial Position as at the beginning of the preceding period in addition to the minimum comparative financial report is presented.

e) Budget comparative figures

Unless otherwise stated, the budget comparative figures shown in this annual financial report relate to the original budget estimate for the relevant item of disclosure.

f) Superannuation

The Shire contributes to a number of Superannuation Funds on behalf of employees. All funds to which the Shire contributes are defined contribution plans.

g) Fair value of assets and liabilities

Fair value is the price that the Shire would receive to sell the asset or would have to pay to transfer a liability, in an orderly (i.e. unforced) transaction between independent, knowledgeable and willing market participants at the measurement date.

As fair value is a market-based measure, the closest equivalent observable market pricing information is used to determine fair value. Adjustments to market values may be made having regard to the characteristics of the specific asset or liability. The fair values of assets that are not traded in an active market are determined using one or more valuation techniques. These valuation techniques maximise, to the extent possible, the use of observable market data.

To the extent possible, market information is extracted from either the principal market for the asset or liability (i.e. the market with the greatest volume and level of activity for the asset or liability) or, in the absence of such a market, the most advantageous market available to the entity at the end of the reporting period (i.e. the market that maximises the receipts from the sale of the asset after taking into account transaction costs and transport costs).

For non-financial assets, the fair value measurement also takes into account a market participant's ability to use the asset in its highest and best use or to sell it to another market participant that would use the asset in its highest and best use.

h) Interest revenue

Interest revenue is calculated by applying the effective interest rate to the gross carrying amount of a financial asset measured at amortised cost except for financial assets that subsequently become credit-impaired. For credit-impaired financial assets the effective interest rate is applied to the net carrying amount of the financial asset (after deduction of the loss allowance).

i) Fair value hierarchy

AASB 13 Fair Value Measurement requires the disclosure of fair value information by level of the fair value hierarchy, which categorises fair value measurement into one of three possible levels based on the lowest level that an input that is significant to the measurement can be categorised into as follows:

Level 1

Measurements based on quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date.

Level 2

Measurements based on inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly or indirectly.

Level 3

Measurements based on unobservable inputs for the asset or liability.

The fair values of assets and liabilities that are not traded in an active market are determined using one or more valuation techniques. These valuation techniques maximise, to the extent possible, the use of observable market data. If all significant inputs required to measure fair value are observable, the asset or liability is included in Level 2. If one or more significant inputs are not based on observable market data, the asset or liability is included in Level 3.

Valuation techniques

The Shire selects a valuation technique that is appropriate in the circumstances and for which sufficient data is available to measure fair value. The availability of sufficient and relevant data primarily depends on the specific characteristics of the asset or liability being measured. The valuation techniques selected by the Shire are consistent with one or more of the following valuation approaches:

Market approach

Valuation techniques that use prices and other relevant information generated by market transactions for identical or similar assets or liabilities.

Income approach

Valuation techniques that convert estimated future cash flows or income and expenses into a single discounted present value.

Cost approach

Valuation techniques that reflect the current replacement cost of the service capacity of an asset.

Each valuation technique requires inputs that reflect the assumptions that buyers and sellers would use when pricing the asset or liability, including assumptions about risks. When selecting a valuation technique, the Shire gives priority to those techniques that maximise the use of observable inputs and minimise the use of unobservable inputs. Inputs that are developed using market data (such as publicly available information on actual transactions) and reflect the assumptions that buyers and sellers would generally use when pricing the asset or liability are considered observable, whereas inputs for which market data is not available and therefore are developed using the best information available about such assumptions are considered unobservable.

j) Impairment of assets

In accordance with Australian Accounting Standards the Shire's assets, other than inventories, are assessed at each reporting date to determine whether there is any indication they may be impaired.

Where such an indication exists, an impairment test is carried out on the asset by comparing the recoverable amount of the asset, being the higher of the asset's fair value less costs to sell and value in use, to the asset's carrying amount except for non-financial assets that are:

- land and buildings classified as property, plant and equipment;
- infrastructure; or
- vested improvements that the local government controls, in
- circumstances where there has been an impairment indication of a general decrease in asset values.

These non-financial assets are assessed in accordance with the regulatory framework detailed in Note 10.

Any excess of the asset's carrying amount over its recoverable amount is recognised immediately in profit or loss, unless the asset is carried at a revalued amount in accordance with another Standard (e.g. AASB 116 *Property, Plant and Equipment*) whereby any impairment loss of a revalued asset is treated as a revaluation decrease in accordance with that other Standard.
